

AUSTRALIA'S STUDENT VISA SYSTEM IS IN DECLINE

It takes more than 3 times as long and costs up to 4 times more to get a student visa in Australia than in other leading study destinations.

Students think it's too hard and too expensive to study in Australia.

\$18 billion in export revenue and more than 120,000 Australian jobs are on the line.

The Australian Government has thoroughly reviewed our student visa system, but has struggled to continue this consultative process through the draft report stage.

We're doing our part to fix other problems in the sector. We're boosting quality standards, reassuring our neighbours that Australia is still the best place in the world to study and cooperating with Government on important reforms.

NOW IT'S TIME FOR THE AUSTRALIAN GOVERNMENT TO DO ITS PART

Release the draft review of student visas and consult with Australia's third largest export industry about its own future.
